Wine list

Dear connoisseur

The following booklet is a carefully selected choice of alcoholic and non-alcoholic beverages, with basically one purpose: good mood and joy!

Based on our highest quality requirements, we offer Swiss enologic produce combined with international classics.

Our beverage offering holds:

- A variety of high-quality Swiss wine, representing the cultural legacy of their area,
- The rich heritage of the “ancient wine world” with a selection of great European wines,
- An exclusive choice of Japanese Sake,
- Carefully selected non-alcoholic beverages. Natural fruit juices from sustainable production, which suit ideally for aperitif or food compagnon,
- A complemented choice of lemonades/softdrinks (mostly regional, organic and or fair-trade) and caffeinated beverages.

A balanced drinks menu evolves following the criteria of pleasure and sustainability. For this reason, we keep in touch with winemakers and producers, optimise logistic routes continuously and integrate an increasing amount of organic or biodynamic produced great wines and fruit juices. Please ask our staff for organic, vegan or halal drinks.

You are cordially invited to rummage these pages. We dispensed with the table of contents. Enjoy the time or ask us for advise.

Thank you for your understanding should a certain wine or vintage of a certain wine not be available anymore.

Sake-Wine

Sake is rice wine from Japan. In terms of production, rice wines are actually beers, as the starch for alcoholic fermentation needs to be first unlocked to sugar. The alcohol content of sake is higher than that of wine from grapes.

Sake is offered as an aperitif, during the meal and as a digestif. In addition, it is part of sauces and marinades of Japanese cuisine.

Sake contains 15% or more by volume of alcohol and is served hot or cold. Hot sake is especially popular in the cold season.

We are lucky to present some fine products below, suggested by Dr. Charles Iten from central Switzerland, first Swiss Sake Sommelier:
